

AI CRAFTED TONE

AIDA-X

AI CRAFTED TONE

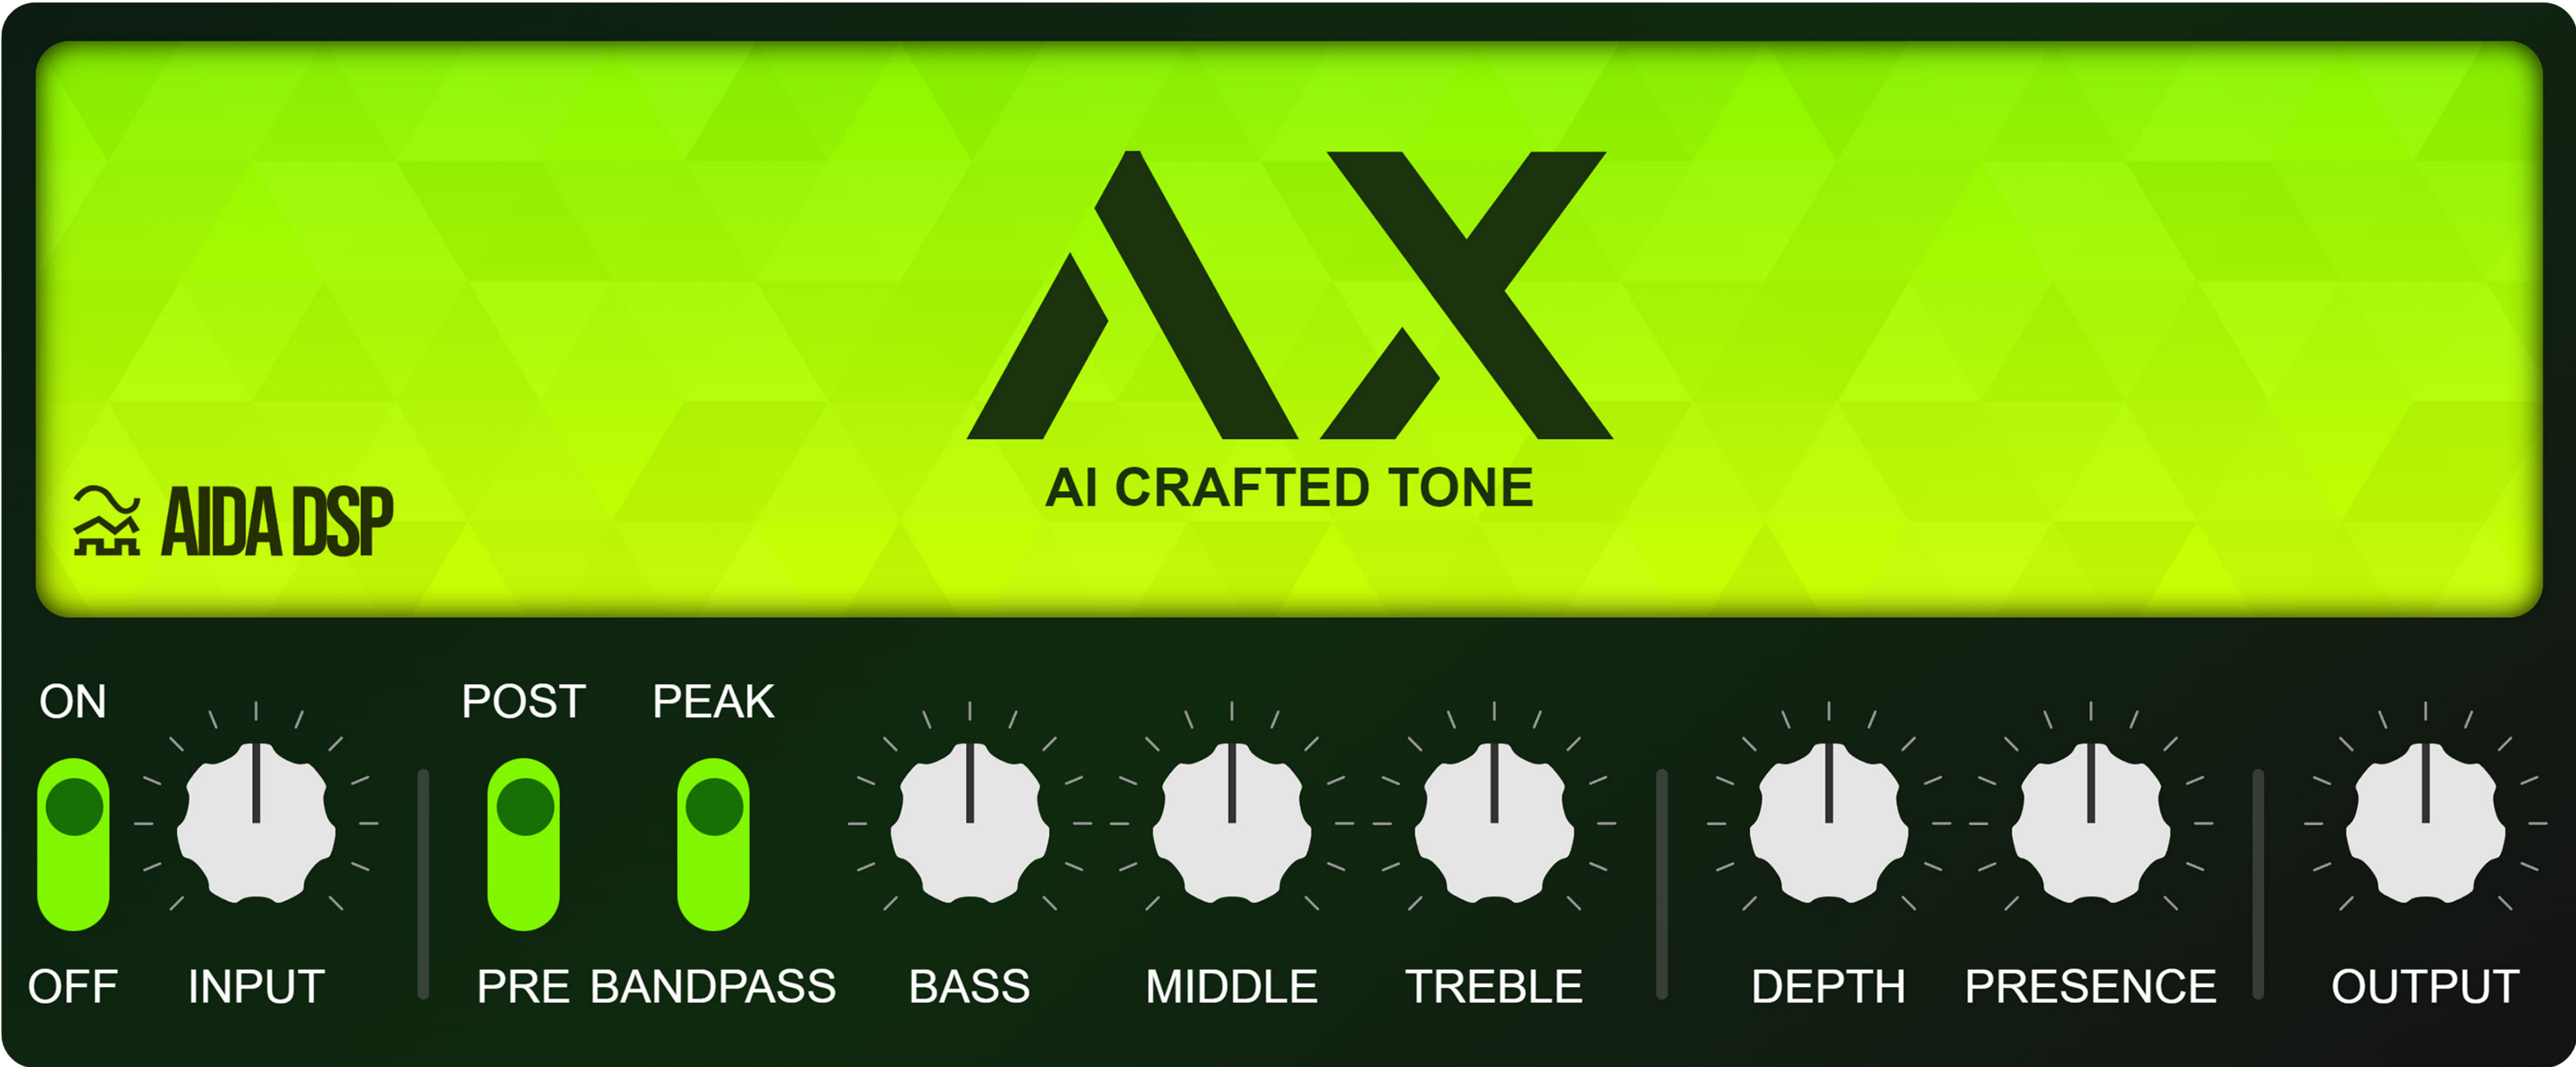

The most versatile AI MODELER for guitar amps.

AIDA-X gives you the dynamic response and sound that you expect from a real guitar amp. All made possible by advanced machine learning techniques.

AIDA DSP teamed up with MOD Audio to bring this exciting new technology to MOD devices and as a audio plugin for all major platforms. It allows users to load and play their favourite guitar amps all within your DWARF or DAW.

Easily capture the sound of your own gear with our new training software available for free online. Or choose from a vast and growing library of user uploaded amps and models.

MOD AUDIO

BYPASS
lets the audio pass-through when off.

INPUT LEVEL
Input Level control before sending it to the Amp Model.

PRE // POST
changes the position of the tone controls before or after the Amp model.

PEAK // BANDPASS
changes the MID control to Bandpass so that BASS and TREBLE will be excluded

TONECONTROL
with adjustable Frequency and Q

BASS
Low shelf EQ

MIDDLE
Parametric EQ

TREBLE
High shelf EQ

DEPTH
Parametric EQ to boost the low end.

PRESENCE
High Shelf EQ to boost the high end.

OUTPUT
final gain compensation, does not apply to the by-passed signal.
